

!! CONSTRUCTION ALERT !!

CENTRAL HEBER WATER & SEWER REPLACEMENT PROJECT

▶ **NOTICE: Construction Coming Soon**

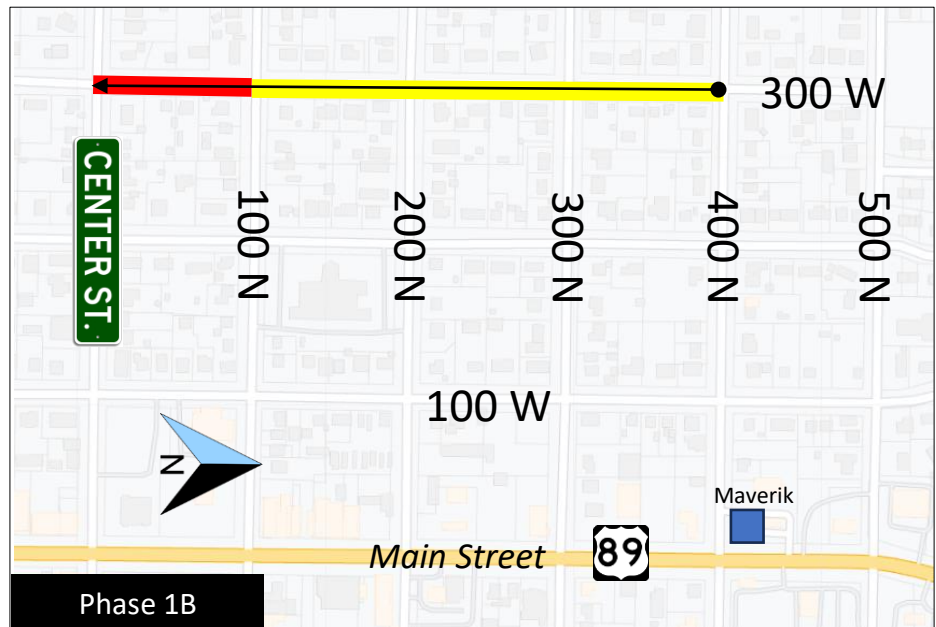

Beginning as early as next week, construction activity is expected to start on **300 W**, **between 100 N and Center Street**. (See map below) Work should continue for approximately 3 weeks. Once completed, excavated regions will be filled with temporary pavement. This will require the daytime closure of the roadways in sections, but local traffic will be allowed into the active project area. Trenches will be filled nightly for safety. Detours will be posted for thru-traffic. The contractor will prioritize snow removal in the active areas of work and no work is permitted on holidays.

Crews will enter your street to execute the following work...

- Excavate roadway to install new sewer pipeline & maintenance manholes
- Excavate into properties on both sides of street to install new sewer pipeline laterals through public ROW region. (sewer cleanouts may be relocated)
- Final roadway paving to be completed once weather warms sufficiently in 2024
